

Attention to Sterilization Centers !

**In The Safety Of Sterilization,
We Challenge To The World.**

**No Limits
Of Diameter and Length,
Load and Quantity
in Lumen Material and
Endoscope Sterilization!**

hdrozone

4. Generation Hybrid Technology

**HRF 3000 Ozone & Hydrogen Peroxide,
Hydronium Plasma Sterilization Device**

- 15 meters long, 2 mm diameter one side closed PCD,
- 4,5 meters long, 1 mm diameter one side closed PCD,
- 1 meters long, 0,5 mm diameter one side closed PCD,
- 1 meters long, 0,7 mm diameter one side closed steel lumen PCD
Material sterilization was validated.

It Can Also Be Used As A Hydrogen Peroxide Plasma Sterilization Device.

Working Technique of HDROZONE Device:

In sterilization of heat and humidity sensitive products, hydrogen peroxide and ozone technique with plasma, hydronium, peroxone, heavy molecules (HO₃, HO₄, H₂O₃, H₂O₄, HO₅, OOH, H₃O... etc.), radicals, hydroxyls and ion technique are used.

R&D and Production of HDROZONE, has been made by **TEKNOMAR**

Longest Medical Lumen Product
Sterilization Application has
been made to the **GUINNESS**
RECORDS Book.
